NATRIANCE BRIGHTENER

- ➔ Natriance Brightener is a yeast extract helps skin reveals its own radiance, creates a natural slow and sublimates skin tone for a brighter and more luminous appearance.

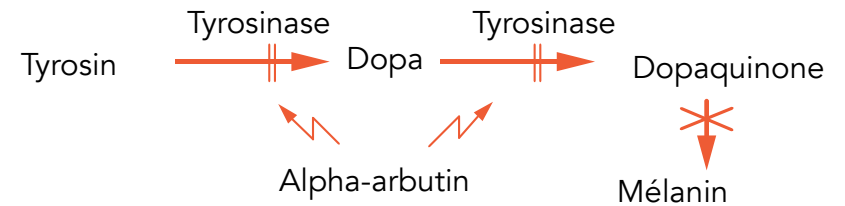

- ➔ Consider writing: When skin is treated with Natriance Brightener at 3% for between 28 and 42 days, a suggested enhancement of skin luminosity is found in vivo from an increase of skin Luminance L.

ALPHA-ARBUTIN

- ➔ Melanin fades away and disappears quicker properties without presenting any danger for the health and skin. It also acts by inhibiting tyrosinase.

- ➔ Inhibits the melanin epidermal biosynthesis by blocking the enzymatic oxidation of tyrosine and DOPA.
- ➔ Acts selectively on melanocytes with an excess of melanogenesis.

ACHROMAXYL™

- ➔ Achromaxyl™ is botanical extract lightening the skin with a reduction in the appearance of aging spots.
- ➔ Studies showed that Achromaxyl™ ISR biofunctional may decrease tyrosinase activity in melanocytes in vitro.

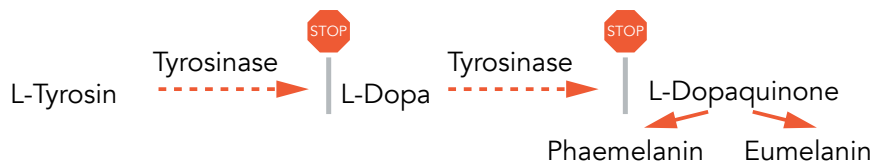

ACTICIRE®

- ➔ Acticire® is a natural agent based on jojoba waxes.
- ➔ It brings softness to the skin, starts, protects and moisturizes the dry and damaged skin.

MELFADE® (Bearberry extract)

- ➔ Regulatory action on melanin.
- ➔ Reduces imperfection and skin spots due to a melanin excess.

STABILIZED VITAMIN C

- ➔ Reduces melanine already oxidized and stops darkening skin process.
- ➔ Known for antioxidant and exfoliating properties.
- ➔ Active repair of photo-induced skin aging.

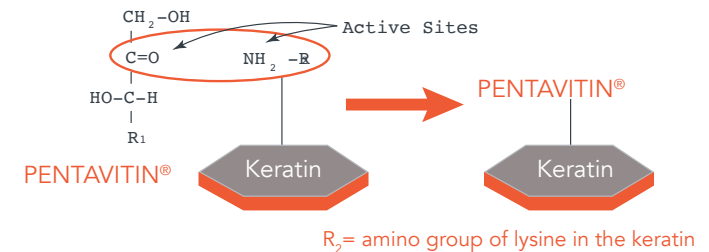

PENTAVITIN®

Saccharide isomerate is a carbohydrate plant complex:

- ➔ Moisturizes skin for 72 hours.
- ➔ Consolidate the skin barrier functions.
- ➔ Soothes and moisturizes deeply.

The skin become smoother (50%) after 4 weeks of use.

MONACO

ANTI ACNE GEL

ANTI ACNE GEL

Effects:

- Removes dead skin cells.
- the skin is refined and the sebum secretion is regulated.
- Soothes and purifies the skin.

The anti acne gel NOHOOH moisturizes, reduces irritations and preserves the epidermal balance without damaging the skin.

The active substance (**ACNACIDOL BG®**) is ideally suitable for teenagers and skin disorders.

How to use:

Lather a small amount of anti acne cleaning gel and gently massage over the face. Rinse with water and dry with a personal towel.

The skin is now clean and radiant.

ANTI ACNE CARE

Salicylic acid + Acnacidol BG®

Repair & treatment action

Effects:

- Removes small imperfections, spots/pimples and blackheads.
- less blackheads, pores are cleansed and the skintone is more even.
- Matifies the skin.

How to use:

to be used mornings and evenings on a clean and dry skin.

CLINICAL STUDY

Clinically tested Royal Jelly mimetic **10-HDA** that controls and reduces sebum for acne prone skin.

ACNACIDOL BG® is a unique active ingredient aimed at re-establishing the physiological balance in acne-prone skin.

It is composed of 10-hydroxydecanoic acid (**10-HDA**), sebacic acid and decanediol.

The target molecule of **ACNACIDOL BG®**, **10-HDA**, is a synthetic bio-mimetic version of a hydroxyl acid naturally present in Royal Jelly.

During clinical studies, **ACNACIDOL BG®** provided excellent results for seborregulation. Additional in-vitro tests on *Propionibacterium acnes* demonstrated excellent anti-bacterial activity.

Properties:

- Decreases sebum synthesis in 1 hour.
- Diminishes the number of active sebaceous glands in 1 hour.
- Anti-bacterial and anti-fungal properties.

Cosmetic applications:

- Cosmetic skincare products for mixed and oily skin.
- Acne-prone skin.

IN VIVO EFFICIENCY

1. Short-term effect on sebaceous glands and sebum

ACNACIDOL BG® (3%) in an emulsion was applied to the forehead for one day and compared to a placebo.

Results demonstrate that within one hour, a single application of **ACNACIDOL BG®** at 3% considerably decreases sebum excretion associated with a significant reduction of active sebaceous glands. This effect lasted for at least 6 hours.

Figure 1 : Number of active sebaceous glands

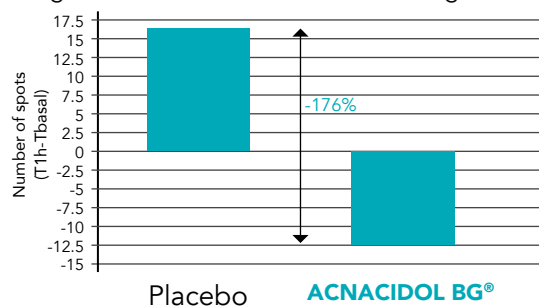

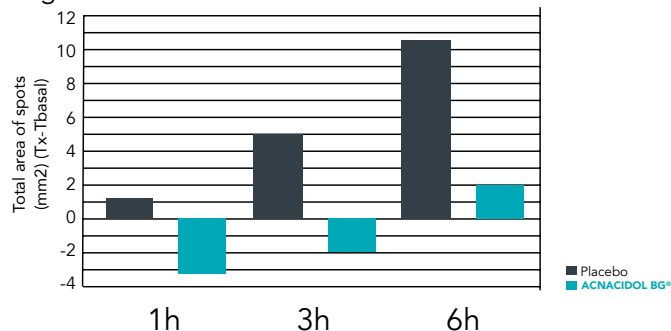

Figure 2: Sebum excretion rate

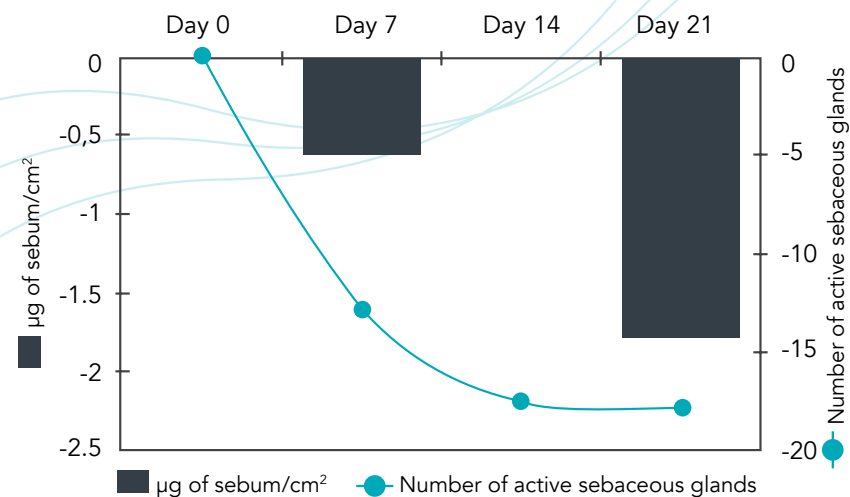

IN VIVO EFFICIENCY

2. Long-term effect on sebaceous glands and sebum

A double-blind clinical study was performed over 3 weeks on 12 volunteers with oily or mixed skins using **ACNACIDOL BG®** formulated at 3% against a placebo.

ACNACIDOL BG® at 3% usage induces a consistent and long-term decrease of sebum. This effect is visible within the first week and reaches a maximum and continual effect after 2 weeks. A plateau effect is also observed illustrating that **ACNACIDOL BG®** does not induce dry skin in the long term.

SPF 50+ SUNSCREEN

Very high level of protection UVA/UVB against sun damage and skin aging.

This sunscreen benefits from last generation of mineral filters combined with high tolerance hypoallergenic filters.

This formula rich in moisturizing agents provides intense and durable hydration .

VITAMIN E

- Anti oxydant.
- Anti-Aging.

VENUCEANE™

- Anti-oxydant from natural origin wich is activated by warmth.
- Reinforces skin barrier and increases moisturisation.

Indications:
